

## Anthropology BA

61 Quarter Credits

### Why Study Anthropology at EWU?

Through the study of culture, anthropology offers students a set of tools and skills that help make sense of how human difference across both time and space is simultaneously preserved and threatened within an increasingly interconnected and globalized world.

Anthropology offers students the opportunity to broaden their understanding of peoples and cultures of the world, both today and in the past. The four-field approach asks students to consider the biological, cultural, prehistoric/historic and linguistic aspects of the human condition. Then students will put that knowledge to work by doing independent research under faculty supervision.

### Is Anthropology for me?

Archaeological anthropologists excavate the remains of past societies to learn about how we have changed and remained the same over time. Cultural and linguistic anthropologists engage contemporary communities to learn about the most pressing social, political, economic and health-related problems experienced by people throughout the world. Biological anthropologists examine human biological evolution and genetic diversity in order to understand how social and cultural choices are enacted on and encoded within the human body.

### Career Opportunities

This holistic study of culture enables anthropologists to provide the sort of expertise that is sought by non-profits, businesses, government agencies, community organizations and cultural resource management firms.

Anthropology students who plan to become candidates for advanced degrees are advised to complete two years of a foreign language and a course in statistics.
