DESCRIPTION

The purpose of this course is to enhance success for Health Science students in online EWU courses. The course addresses common challenges EWU Health Science students experience when transitioning to online learning while fostering a sense of belonging, despite the remote nature of the online learning. Students will develop a Term Success Plan as a basis for success in this and future terms. This course is appropriate for students who want more support with navigating online coursework.

FOCUSED ON

Supportive, low-stakes experiences such as: use of online-based communication tools; various online exam/quiz tools; success planning; Academic Integrity Policy and online learning scenarios; motivational and time management tools; campus-based (virtual and on-ground) student support resources; understand how mindset, motivation, and sense of belonging impacts college success.
