

EWU Programmatic SLO Assessment

AY 2014-15 and “Closing the Loop” for AY 2013-14

Introduction:

Assessment of student learning is an important and integrated part of faculty and programs. As part of ongoing program assessment at Eastern Washington University, each department is asked to report on assessment results for *each* program and *each* certificate for *at least one* Student Learning Outcome (SLO) this year. To comply with accreditation standards, the programs must also demonstrate efforts to “close the loop” in improving student learning and/or the learning environment. Thus, this template has been revised into two parts.

Resources:

Check this site for sample reports (created with the previous year’s template) by EWU programs and other assessment resources: <http://access.ewu.edu/graduate-education/academic-planning/faculty-support/student-learning-assessment/sample-program-slo-assessment-reports>

Additional resources and support are available to:

- 1) Determine whether students can do, know or value program goals upon graduation and to what extent;
- 2) Determine students’ progress through the program, while locating potential bottlenecks, curricular redundancies, and more; and
- 3) Embed assessments in sequenced and meaningful ways that save time.

Contact Dr. Helen Bergland for assistance with assessment in support of student learning and pedagogical approaches: hberglan@ewu.edu or 509.359.4305.

Use this template to report on your program assessment. **Reports are due to your Dean and to Dr. Helen Bergland (hberglan@ewu.edu), Office of Academic Planning, by Nov. 2, 2015.** (Some Deans have elected to move the deadline up.

Degree/Certificate: MS Psychology: Clinical and General/Experimental

Major/Option: Psychology

Date: 10/12/2015

Part I – Program SLO Assessment Report for 2014-15

Part I – for the 2014-15 academic year: Because Deans have been asked to create College-Level Synthesis Reports annually, the template has been slightly modified for a) clarity for Chairs and Directors, and b) a closer fit with what the Deans and Associate Deans are being asked to report.

1. **Student Learning Outcome:** The student performance or learning objective as published either in the catalog or elsewhere in your department literature.

How well did your course work inform you of the historical context in which psychological theories were developed?

2. **Overall evaluation of progress on outcome:** Indicate whether or not the SLO has been met, and if met, to what level.

_____ SLO is met after changes resulting from ongoing assessments, referencing assessment results from the previous year to highlight revisions;

_____ SLO is met, but with changes forthcoming;

__xx__ SLO is met without change required

3. **Strategies and methods:** Description of assessment method and choices, why they were used and how they were implemented.

Students in the graduate program were sent a link for an online multiple choice survey asking students to rate the degree to which this SLO was met

4. **Observations gathered from data:** Include findings and analyses based on the strategies and methods identified in item #3.

- a. Findings: 30% of responses indicated this SLO was met “somewhat”, 39% reported it was met “adequately” and 31% reported it was met “above average”.

- b. Analysis of findings: No one reported that it was unmet and 70% reported that it was met adequately or above.

5. **What program changes will be made based on the assessment results?**

- a) Describe plans to improve student learning based on assessment findings (e.g., course content, course sequencing, curriculum revision, learning environment or student advising).

No curriculum changes anticipated based on these results

- b) Provide a broad timeline of how and when identified changes will be addressed in the upcoming year.

N/A

6. Description of revisions to the assessment process the results suggest are needed and an evaluation of the assessment plan/process itself.

We assess our students in the Spring quarter. This allows us to assess both the 1st year and 2nd year students. This process has worked well and increased the number of students participating

NEW: PART II – CLOSING THE LOOP
FOLLOW-UP FROM THE 2013-14 PROGRAM ASSESSMENT REPORT

In response to the university's accrediting body, the [Northwest Commission on Colleges and Universities](#), this section has been added. This should be viewed as a follow up to the previous year's findings. In other words, begin with findings from 2013-14, and then describe actions taken during 2014-15 to improve student learning along, provide a brief summary of findings, and describe possible next steps.

PLEASE NOTE: The College-Level Synthesis report includes a section asking Deans to summarize which programs/certificates have demonstrated "closing-the-loop" assessments and findings based on the previous year's assessment report.

Working definition for closing the loop: *Using assessment results to improve student learning as well as pedagogical practices. This is an essential step in the continuous cycle of assessing student learning. It is the collaborative process through which programs use evidence of student learning to gauge the efficacy of collective educational practices, and to identify and implement strategies for improving student learning.* Adapted 8.21.13 from <http://www.hamline.edu/learning-outcomes/closing-loop.html>.

1. Student Learning Outcome(s) assessed for 2013-14

While our learning objective was met with 90% approval during this time period, students reported they would like to have more class work in therapeutic techniques

2. Strategies implemented during 2014-15 to improve student learning, based on findings of the 2013-14 assessment activities.

We added a class in advanced psychotherapy strategies. We combined course work and lab work into one quarter for personality and behavioral assessment.

3. Summary of results (may include comparative data or narrative; description of changes made to curriculum, pedagogy, mode of delivery, etc.): Describe the effect of the changes towards improving student learning and/or the learning environment.

Qualitative statements from current students reflect that adding the additional psychotherapy class has helped with developing their clinical skills.

4. What **further changes to curriculum, pedagogy, mode of delivery**, etc. are projected based on closing-the-loop data, findings and analysis?

We are continuing to monitor our program curriculum to insure that our clinical students can achieve licensure in Washington State and the surrounding area.

Definitions:

1. **Student Learning Outcome:** The student performance or learning objective as published either in the catalog or elsewhere in your department literature.
2. **Overall evaluation of progress on outcome:** This checklist informs the reader whether or not the SLO has been met, and if met, to what level.
3. **Strategies and methods used to gather student performance data,** including assessment instruments used, and a description of how and when the assessments were conducted. Examples of strategies/methods: embedded test questions in a course or courses, portfolios, in-class activities, standardized test scores, case studies, analysis of written projects, etc. Additional information could describe the use of rubrics, etc. as part of the assessment process.
4. **Observations gathered from data:** This section includes findings and analyses based on the above strategies and methods, and provides data to substantiate the distinction made in #2. For that reason this section has been divided into parts (a) and (b) to provide space for both the findings and the analysis of findings.
5. **Program changes based on the assessment results:** This section is where the program lists plans to improve student learning, based on assessment findings, and provides a broad timeline of how and when identified changes will be addressed in the upcoming year. Programs often find assessment is part of an ongoing process of continual improvement.
6. **Description of revisions to the assessment process the results suggest are needed.** Evaluation of the assessment plan and process itself: what worked in the assessment planning and process, what did not, and why.

Some elements of this document have been drawn or adapted from the University of Massachusetts' assessment handbook, "Program-Based Review and Assessment: Tools and Techniques for Program Improvement" (2001).
