

There is no charge to departments or shops for any work requested of or performed by EH&S.

Ergonomics

EH&S can come and evaluate your workspace to address ergonomic issues. We can rearrange and adjust your existing equipment to improve your ergonomic comfort as well as provide recommendations for new equipment.

Indoor Air Quality and Noise

If you are experiencing problems in your workspace with air quality or noise, EH&S can conduct testing to evaluate your area. We can provide suggestions for alterations or equipment that may help to reduce issues you are experiencing.

Submit your incident report online.

Incident Reports

In an effort to increase safety on campus, please submit an incident report to EH&S for all:

- ⇒ Hazards found or identified
- ⇒ Injuries or illnesses that occur on campus
- ⇒ Injuries or illnesses that happen to EWU students or employees on EWU sponsored trips/events
- ⇒ Near misses
- ⇒ Chemical or biological spills or releases
- ⇒ Fires or explosions

ENVIRONMENTAL HEALTH & SAFETY

Environmental Health & Safety

Our mission is to ensure a safe and healthy environment for all students, faculty, staff, and visitors, and to protect the environmental integrity of the campus and surroundings.

We work with employees, departments, and shops to ensure compliance with federal and state regulations regarding safety and the environment. To accomplish this we:

- Provide safety and regulatory trainings
- Inspect buildings and workplaces for health or safety issues and work to remedy them
- Collect and dispose of hazardous and universal waste that is generated on campus
- Serve as a resource for safe work practices and regulations that affect the university
- Maintain records of incidents that occur on campus, or to persons associated with the university
- Respond to chemical or biological issues on campus

Training Classes

These are examples of some of the trainings provided by EH&S. Special trainings can be given at the request of a department or shop.

- Aerial Lift Training
- Asbestos & Lead Awareness
- Bloodborne Pathogen Training
- Building Captain Training
- Confined Space Entry
- Fire Extinguisher & AED Training
- Hazard Communication
- Hazardous Waste Training
- Lockout/Tagout Training
- New Employee Orientation
- Radiation Safety
- Respiratory Fit Testing

Fire Extinguisher Training

Hazardous and Universal Waste

EH&S collects and safely disposes of several types of universal waste including batteries, light bulbs, ballasts, and aerosol cans.

We also collect hazardous waste, both chemical and biological, that is generated on campus and dispose of it.

In addition to waste, we also collect unwanted chemicals and work to redistribute them to departments or shops that can use them.

For questions regarding waste and chemical recycling, contact Kathy Kees x2788.

Deactivation of High Hazardous Waste
