

McKinstry is working out the parking operations with Republic Parking for the Catalyst facility. Until they provide physical permits, as long as you have purchased a permit online and registered any vehicles attached to that permit, you are good to park. Republic will be providing physical permits eventually but for now, the license plate is the permit.

The faculty lot is located around the eastside of the Catalyst building; access to the lot is down the service drive (heading north toward the railroad tracks) and the lot entrance is toward the east and wraps around to the east/southeast facing the building. It will be posted/signed as such but we are not sure when permanent signage will be up and ready. Winter and Spring quarter permits will go on sale the Friday before the week of finals. It is the same schedule we use here on the Cheney campus and the permits will again be available online.

If the 57 stalls in the faculty lot are full, please overflow into the upper westside lot; the public lot. If you have any trouble finding a space, please contact me at 359-6448 to alert me of this issue and I will work with the onsite management to resolve any parking problems.

EWU Cheney will accept the Catalyst permit here on campus for occasional parking in both P3 and P17.
