

# Overrides/Permits on EagleNET

- **Campus Restriction Override** = DO NOT USE - if the student needs this type of override it usually means his/her campus screen is coded incorrectly. Contact Records & Registration to have campus coding checked.
- **Class Restriction Override** = used to override class standing restrictions (SR, JR, SO, etc.)
- **Course CoRequisite Override** = will allow the student to register in a course that requires the student to be concurrently enrolled in another course WITHOUT registering for the other required course.
- **College Restriction Override** = used to override college restrictions
- **19-22 Cr Overld--Contact R&R** = notation by the appropriate advisor, chair and/or dean that the student is authorized to take up to 22 credit hours; REQUIRES NOTIFICATION to Records & Registration (via email or phone) to have the student's credit hours manually changed (Banner does not update the student's maximum credit hours automatically when this notation is made).
- **Degree Restriction Override**= degree restriction override; allows an undeclared student or a student without the required degree into the course.
- **Level Restriction Override** = will override ANY level restriction. Please note: All graduate-level courses needing an override must be approved by the Graduate Studies Office.
- **Linked Course Override** = "Linked Courses" function is currently not used; this would override "linked course" requirements, if/when this function was used.
- **Major Restriction Override** = will override the requirement for the student to be declared in a particular major in order to register for the course.
- **Max Capacity Override** = will allow the student to register in a course OVER the maximum number of students allowed; student cannot be on a waitlist (should drop from the waitlist) when attempting to register for the course or the override will not work; SHOULD NOT BE USED without consideration of the maximum capacity of the class room.
- **Prerequisite Override** = assumes the student has fulfilled requirements on coursework not yet available or coded as equivalent to a prerequisite course in Banner.
- **Prerequisite Test Override** = will override BOTH course and test prerequisites; generally used to distinguish when a test score not yet available in Banner was used to determine the student's eligibility instead of coursework.
- **Program Restriction Override** = will override the requirement for the student to be declared in a particular program in order to register for the course.
- **Requirement Waived** = notation only; will not override any course requirements; REQUIRES NOTIFICATION to Records & Registration (via In-Person Registration/Change Form) to have the student's credit hours manually changed.
- **Special Authorization** = will override/authorize instructor and department approval requirements for a course.
- **Time Conflict Override** = will allow a student to register for a course that has a time overlap with another course.
- **Auth to add fm WL--Contact R&R** = notation only; REQUIRES NOTIFICATION to Records & Registration (via email or phone) to have the student manually added to the course (Banner does not automatically add the student to the course when this notation is made).
